Department of Plant and Agroecosystem Sciences
COLLEGE OF AGRICULTURAL & LIFE SCIENCES
UNIVERSITY OF WISCONSIN–MADISON

April 3, 2024

To whom it may concern,

I am writing to enthusiastically recommend Dr. Ellen Cecil-Lemkin for the Assistant Teaching Professor title. I have had the absolute privilege of working with Dr. Cecil-Lemkin for the past three years while I worked towards finishing both my M.S. and Ph.D. degrees at UW–Madison. I can state with absolute certainty that I would not have finished my thesis or dissertation in the timeline that I did without Dr. Cecil-Lemkin's support and guidance.

Dr. Cecil-Lemkin is unwavering in her compassion and dedication to the students that she serves. Her technical expertise of the writing process paired with empathetic guidance and support makes her stand out. Dr. Cecil-Lemkin fosters an environment of trust and safety, allowing students to work through the often-neglected emotional side of writing. Her patience and genuine care for my well-being made an incredible difference with my relationship with the writing process and my ability to accomplish my goals.

I have no doubt that Dr. Cecil-Lemkin is a fantastic candidate for the promotion to Assistant Teaching Professor. Her compassion, expertise, and dedication to her students will continue to set her apart and make a difference in the lives of those she serves. Dr. Cecil-Lemkin is truly an asset to the University of Wisconsin–Madison. Please feel free to contact me if you require any further information.

Respectfully,

H. Ortmeier-Clarke
